

COACH MODEL : T-800 & T-900

DATE : 03/03/2011

SUBJECT : Instruction for Replacement of OEM Speedometer

Program Button

To Install and Program New Speedometer

1. Remove three harness from the OEM speedometer and connect to new adapter harness.
2. Verify coach differential ratio for proper setting.
3. Press and hold the button at the front of speedometer.
4. Turn on master and ignition switch and then plug in connecting plug into back of the speedometer.
5. After approximately 3 seconds 8000 will appear, then release button
6. By briefly pressing the button, the ratio changes by 10 impulses per mile. By keeping the button pressed it changes by 100 impulses per mile.
7. Set Pulse to ratio after setting pulse it will store instantly. To return to normal mode, ignition has to be switched off and on again.
8. Pulse setting numbers are suggested. Fine tuning may be needed.
9. Verify the speed is correct by using another vehicle or a GPS.

Program Speedometer Pulse to the Differential Ratio using chart below:

Ratio:	Pulse:
3:07 to 1	= 11850
3:31 to 1	= 13500
3:70 to 1	= 15190
4:30 to 1	= 16890
4:88 to 1	= 18580
