

COACH MODEL : T2140, T2145, C2045

DATE : 03/21/2011

SUBJECT : Fuel filter Replacement Instructions on DD13 Engines.

Fuel-water separator

Final filter

Pre-filter

Hand primer

"Water in fuel" sensor

Fuel-water separator drain cock

NOTE:
Do not tilt the filters when removing from the housing. Possible damage to the filter or stand pipe may occur.

1. Use a 36-mm socket, to unscrew all three filter caps.
2. Pull the cap and filter straight up and allow the fuel to drain back.
3. Install all three new filters. Torque spec's are cast in the filter cover.
4. Operate the hand primer on module for three minutes or 250 strokes.
5. Crank the engine for 20 seconds intervals, allowing 60 seconds starter cool down periods.
6. Repeat steps 4 & 5 until engine starts.
7. Fuel Filter Kit Part Number is: A0000904251.
8. For more information contact ABC Customer Care.
